"OUR BUSSINESS IS YOUR ASSET"

Our Products & Services

Software Solutions

Fixed Asset Management

Hosted on **Cloud Server** or locally on **Client Server**

Seamless integration with all legacy systems

Centralized asset register

Accurate Planning & Budgeting

Operations and Maintenance recording and management

Asset Verification via mobile app with photos

Assign assets to asset custodians and identify miss use of assets

Comprehensive reporting

View and record infrastructure assets via **GIS Platform**

General Ledger and Asset Register is automatically aligned

Software Solutions

RFID tracking

Track high value assets anywhere on the premises. Know **real-time** where tagged assets are located.

Schedule asset movements and set **movement zones**

Get SMS, E-Mail and alarm **notifications** when un-approved asset movements happen

Manager can **book out** assets and set return dates. View assets **not returned** on time.

Measure productivity of personnel and assets

Warehouse management of stock and consumables

ANALYTICAL AND MANAGERIAL BENEFITS

- Get maximum use out of your capital investment.
- Ensure correct and optimal use of assets.
- Save costs on fuel, maintenance and repairs by curbing unauthorised used.
- Minimise loss of assets and stock through theft.
- Increase productivity of operators and assets.
- We put the power back in your hands.
- Analyse use of assets versus maintenance cost.
- Measure operating cost effectively based on accurate info and increase profits.
- Compare operating costs of similar assets
- Accurately forecast and budget for capital and operating expenditure based on actual figures

CUSTOM SOLUTIONS

- All our solutions can be customized to address client specific needs and requirements.

- Proper planning, in-depth scoping and analysis coupled with detailed documenting of the requirements. Ensures we hit the mark every time on time.

WEB SOLUTIONS

- All our solutions are web based and can be hosted on our cloud server or the client's server.

- We are serious about security and offer high security on all our data and system access

STANDARDS & BEST PRACTICES

- Our Fixed Asset Software is based on international best practices, Accounting Standards (IFRS) and 15 years of experience.

- Our RFID hardware complies with all standards and regulations in South Africa and is supported by world class after sales service.

- We use the latest technology when developing software solutions ensuring robust and flexible solutions

- We have started the process to get our Asset Management software solution ISO certified.

Software Solutions

Fleet Management

Track vehicles anywhere throughout Africa with our cost effective universal sim card.

Schedule movement of fleet assets and set **movement zones.**

Get SMS, E-Mail and alarm **notifications** when un-approved fleet movements happen.

Set pre-defined routes and manage fleet accordingly. Set no go zones

Report on (view)

- Vehicle speeds.
- Kilometres travelled or hours worked
- Monitor fuel levels
- Monitor tyre pressure.
- Driver / operator identification
- Harsh braking
- View routes travelled.
- Many more monitoring options

We can measure and report on up to 16 different inputs form the fleet asset.

Disable or **Enable** fleet asset remotely

View **fleet locations** on-site via our GIS platform

Measure productivity of all fleet assets.

Couple the RFID with Fleet Management and you will know what assets passed through an access point and on what vehicle they were transported.

Consulting Services

Asset Life Cycle Advisory Service

Bridging the co-ordination gap of events occurring during the life cycle of capital assets

Ensure ***sustainability*** *and* ***skills transfer***

Software Development & Integration

Customize any of our software solution to fit your specific needs

We develop ***custom*** **solutions** from scratch if required.

We specialise ***System integration***. This enables a ***seamless*** integration between our solution and any legacy systems (Example SAP ERP)***.***
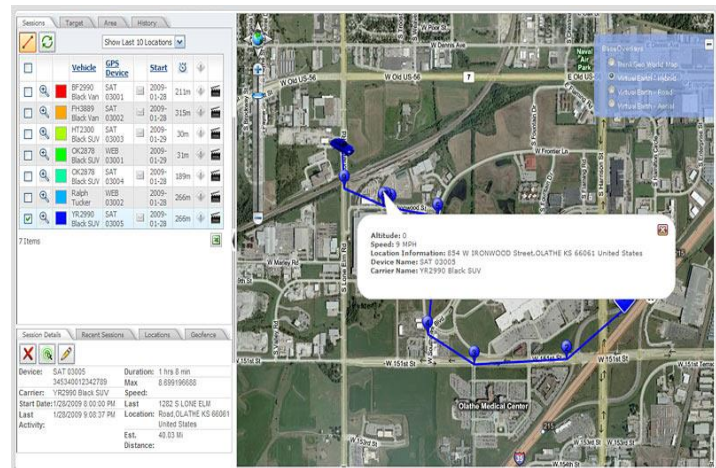

Computer Hardware Supplies

Market leading Technology

Mobile Computers – Do Asset verification and condition assessments

RFID equipment – Real asset tracking and stock management

GPS tracking – Track assets worldwide
